## Kinesiology Tape

You've seen it at the Olympics, now experience it for yourself!! Kinesiology is the science of human movement. Kinesiology Tape is uniquely designed for treatment of muscular disorders, pain relief, joint support, lymph drainage. It works by lifting the skin and relieving pressure on pain transmitters. It supports without restriction and enhances circulation.

Many sports injuries respond well to kinesiology tape, allowing the athlete to remain active, however most applications are actually non-athletic. Once applied, it can be worn up to four days.
